"In the second quarter, we capitalized on the strong bidding opportunities we are seeing in both the public and private markets and increased our CAP to \$6.1 billion, which is a new record," said Kyle Larkin, Granite President and Chief Executive Officer. "I am pleased with each of our segments' execution in the quarter, and we believe our continued focus on operational excellence should continue to produce margin expansion. We are also excited by the opportunities that come with the two acquisitions that we announced yesterday. The acquisition in the Southeast gives us a significant, high-quality aggregate supply on the Mississippi River and provides us with many opportunities to further leverage the supply network to grow our southeast platform. The acquisition in California strengthens our business in the central portion of the state with additional aggregates as we welcome a leading civil construction business into our portfolio. With our upsized credit facility and strong cash generation, I believe we will be able to continue to complete acquisitions to strengthen and expand our home markets in the upcoming quarters."

Gross profit increased year-over-year as a result of improved project execution across our higher quality project portfolio and favorable claim settlements.

CAP increased \$324 million sequentially to \$6.1 billion and increased \$488 million year-over-year. The bidding pipeline continues to be robust across the company in both public and private markets. ## **Outlook**

With the acquisitions announced this week, we are updating our 2025 fiscal year guidance as noted below:

- Revenue in the range of \$4.35 billion to \$4.55 billion with revenue from the new acquisitions of approximately \$150 million
- Adjusted EBITDA margin increased to a range of 11.25% to 12.25%
- SG&A expense unchanged at approximately 9.0% of revenue, inclusive of an estimated \$40 million of stock-based compensation expense
- Effective tax rate for adjusted net income unchanged in the Mid-20s
- Capital expenditures unchanged with a range of \$140 million to \$160 million

We do not provide a reconciliation of forward-looking adjusted EBITDA margin or the most directly comparable forward-looking GAAP measure of net income attributable to Granite because we cannot predict with a reasonable degree of certainty and without unreasonable efforts certain components or excluded items that are inherently uncertain and depend on various factors. For these reasons, we are unable to assess the potential significance of the unavailable information.

“Our updated guidance reflects the inclusion of the new acquisitions in our 2025 results for the remainder of the third quarter and fiscal year,” stated Staci Woolsey, Granite Executive Vice President and Chief Financial Officer. “These acquisitions are in alignment with our capital allocation strategy to invest in high quality businesses that will strengthen and expand our home markets and be immediately accretive to adjusted EBITDA margin and cash flows. Our pro-forma leverage is well within our target and with our expanded credit facility, we are well positioned to act on M&A opportunities in the future.”

## Non-GAAP Financial Information

The tables below contain financial information calculated other than in accordance with U.S. generally accepted accounting principles (“GAAP”). Specifically, management believes that non-GAAP financial measures such as EBITDA and EBITDA margin are useful in evaluating operating performance and are regularly used by securities analysts, institutional investors and other interested parties, and that such supplemental measures facilitate comparisons between companies that have different capital and financing structures and/or tax rates. We are also providing adjusted EBITDA and adjusted EBITDA margin, non-GAAP measures, to indicate the impact of stock-based compensation expense, loss on debt extinguishment in 2024 and other costs, net, which include legal fees for the defense of a former company officer in his ongoing civil litigation with the Securities and Exchange Commission, reorganization costs, strategic acquisition and integration expenses and, in 2024, non-cash impairment charges.

We provide adjusted income before income taxes, adjusted provision for income taxes, adjusted net income attributable to Granite, adjusted diluted weighted average shares of common stock and adjusted diluted earnings per share attributable to common shareholders, non-GAAP measures, to indicate the impact of the following:

- Other costs, net as described above;
- Transaction costs which include acquired intangible asset amortization expense and acquisition-related depreciation;
- Stock-based compensation expense; and
- Loss on debt extinguishment.

We also provide materials segment cash gross profit and materials segment cash gross profit by product line and the related margins to exclude the impact of the segment’s and product line’s depreciation, depletion and amortization from the segment’s and product line’s gross profit. To better illustrate the operational performance generated by the assets of the materials segment, and its product lines, our calculation adds back all depreciation, depletion and amortization to the materials segment and its product lines and does not eliminate any in consolidation. Management believes that non-GAAP financial measures such as materials segment cash gross profit and materials segment cash gross profit by product line and the related margins are useful in evaluating operating performance and are regularly used by securities analysts, institutional investors and other interested parties, and that such supplemental measures facilitate comparisons between companies that have different capital and financing structures.

Management believes that these additional non-GAAP financial measures facilitate comparisons between industry peer companies, and management uses these non-GAAP financial measures in evaluating performance. However, the reader is cautioned that any non-GAAP financial measures provided by us are provided in addition to, and not as alternatives for, our reported results prepared in accordance with GAAP. Items that may have a significant impact on our financial position, results of operations and cash flows must be considered when assessing our actual financial condition and performance regardless of whether these items are included in non-GAAP financial measures. The methods used by us to calculate non-GAAP financial measures may differ significantly from methods used by other companies to compute similar measures. As a result, any non-GAAP financial measures provided by us may not be comparable to similar measures provided by other companies.

(1) The tax effect of adjusting items was calculated using our estimated annual statutory tax rate. The tax effect of adjusting items for the three and six months ended June 30, 2024 excludes the \$27 million loss on debt extinguishment as it was almost entirely non-tax deductible.

(2) The dilutive effect of the 2.75% Convertible Notes and the 3.75% Convertible Notes was 35,000 and 8,138,000 shares for the three and six months ended June 30, 2024, respectively.

(3) When calculating diluted net income attributable to common shareholders, GAAP requires that we include potential share dilution from the convertible notes when not antidilutive. We entered into capped call transactions relating to both the 3.75% and 3.25% convertible notes to offset the dilutive impact of the convertible notes. The impact of the capped call transactions was excluded from the GAAP diluted net income attributable to common shareholders calculation as the impact would be antidilutive. For the purpose of calculating our adjusted diluted net income per share attributable to common shareholders, the dilutive effect of the convertible notes is removed to reflect the impact of the capped call transactions.
